

PROFESSIONAL SUMMARY

Data-driven **Quantitative Commodity Analyst & Commercial Strategist** with high-stakes trading floor experience at **Louis Dreyfus Company (LDC)**. Specializes in global grain markets, building predictive **Supply & Demand (S&D)** models, automating complex trading workflows (**implementation of digital** analytics in Python/VBA), and translating macroeconomic volatility into extraordinary P&L. Proven track record of **confident**, senior-level entrepreneurial problem-solving; most notably directing regional wheat strategies to capture an **ambitious** \$80–\$100/ton profit margin and accurately modeling climate shocks to support **risk management** and protect baseline procurement, with strong **integrity, responsibility, and compliance** mindset aligned to **regulatory requirements**.

PROFESSIONAL EXPERIENCES

Louis Dreyfus Company (LDC) – *Quantitative Commodity Research Analyst*

2024 – Present

- **Market Fundamentals & S&D Balances:** Conduct structured **quantitative analysis** of physical commodity markets, building probabilistic **quantitative modeling** to link regional export flows, production fundamentals, and supply-chain infrastructure to global pricing structures across the **energy market**-adjacent commodities value chain.
- **Forecasting & Modeling:** Engineered a localized Python-based **framework** analytics model to track severe climate/infrastructure disruptions. Successfully investigated anomalies to interpret deviations from the market's consensus loss estimates, saving the commercial desk **\$12–\$15/unit** in procurement cost.
- **Trade Flow & Regional Expertise:** Track and analyze cross-basin export flows across the Middle East and Asia. Investigate market anomalies and "dark" data points to develop validated, actionable insights regarding **regional supply shocks** and their impact on global balances, including network effects, indicator signals, terminal and logistics-driven constraints, and market trend shifts.
- **Global Collaboration:** Instinctively collaborate with international commercial desks to align regional market views, ensuring that our internal supply, demand, and inventory forecasts represent a unified, world-class consensus.

SAP MENA – *Sales & Data Analyst Intern*

2023

- Extracted, cleaned, and analyzed large datasets for 90+ enterprise clients, **strengthening client engagement** by translating business needs into clear analytical outputs using query-driven data retrieval and structured analysis.
- Extracted, cleaned, and analyzed large datasets for 90+ enterprise clients, strengthening client engagement by translating business needs into clear analytical outputs using query-driven data retrieval and structured data analysis.

Dastgyr Tech. – *International Trade & Strategy Apprentice*

2023

- **Pricing Structures & Regional Dynamics:** Analyzed the interrelationship of socio-economic variables, logistics costs, and regional demand dynamics to build a dynamic CIF Pricing Model. Effectively tracked competitor pricing structures and import/export parity applying **market knowledge** to refine assumptions in line with relevant **policy** and **environment** considerations.
- **Data Synthesis & Reporting:** Synthesized key regional developments and inventory data into structured short-form commentary for senior management **presentation** of insights, **communication**, and **problem solving** with **thematic** framing.

EDUCATION

Lahore University of Management Sciences - BSc. Management Sciences ; **High Merit Honor**

2020-2024
